

“Every building starts with a dream, and every dream becomes a reality when built with care and passion”

GENERAL CONSTRUCTIONS

ABOUT US

We offer complete solutions in the construction sector

As part of General Engineering, General Constructions LTD was established in 2019, providing services in the field of construction, project development, project management, and construction supervision. Since 2019, we have been dedicated to investing in the development of the company, as well as in the growth and continuous learning of our team, to ensure that our clients are satisfied with the services we provide.

General Constructions is a company dedicated to providing comprehensive solutions in the construction sector. With years of experience, we specialize in various types of construction works, including residential, commercial, and industrial projects. Our team of experts utilizes the latest technologies and materials to ensure high standards of quality and safety. We are committed to sustainability and innovation, aiming to turn every realized idea into a functional and aesthetically pleasing space.

OUR METHODOLOGY

Step 1

Building Planning

Step 2

Budget Planner

Step 3

Construction work

Step 4

Building completed

Construction of residential and non-residential buildings (core business)

General Constructions offers services for the construction of residential and non-residential buildings, playing a key role in urban development and economic growth. Our residential projects, including houses and apartment complexes, are designed to provide comfortable and functional living spaces for individuals and families. On the other hand, our non-residential buildings, such as offices, retail spaces, and industrial facilities, support a variety of business operations and services. Each project requires careful planning, adherence to regulations, and a focus on sustainability to meet community needs and ensure efficient use of resources. By integrating innovative designs and modern technologies, General Constructions creates spaces that enhance quality of life and foster economic activity.
